DETAILED ACTION

Response to Arguments

1. Those rejections set forth in the prior Office Action that are not repeated in the instant Office Action have been withdrawn in response to Applicant's amendment and/or arguments.

2. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claim 57 is rejected under 35 U.S.C. 102(e) as being anticipated by Fang et al. (US Patent No. 6,686,174 B1).

Page 3

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Fang et al. discloses SEQ ID NO: 11, this sequence is 24 nucleobases in length and is an isolated nucleic acid molecule consisting of between 8 and 25 sequential nucleotides of 1-25 of SEQ ID NO: 55 of the instant application.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 22 recites the phrase "a second nucleic acid molecule," this phrase is vague and indefinite since it is unclear how this second nucleic acid molecule is associated with the nucleic acid vector recited in claim 19.

Conclusion

7. Claims 22, and 57 remain rejected.

8. Claims 1, 5-6, 10, and 14-21, 23-56 are free of the prior art searched, and are allowable.
